

# Benefits & Programs Home

## Welcome to our Benefits & Programs handbook space

This space is available both internally to all Camundi and externally to potential future Camundi. You will have access to learn more our Global Benefits Principles, Global Company Core Benefits and Company Programs, and our Country Specific Benefits. Company Programs and Global Benefits are available to all Camundi whereas Country specific benefits are specifically available to employees based in the country they reside in / are contracted through. Country specific benefits pages include information relating to our offerings in locations where we employ Camundi via our Professional Employer Organisation (PEO) partners at Remote.

## What is the difference between Benefits & Programs?

Company Programs are separate from Employee Benefits as they are related to how we operate as a business to ensure connectivity and productivity as we grow. Employee Benefits can be described as a cash equivalent service, which are either utilised continuously or on a needs basis.
